

Bonn, November 24 – 26, 2025

17th Symposium Sensor Data Fusion: Trends, Solutions, and Applications

Call for Papers

Motivation

To a degree never known before, human decision makers or decision making systems have access to a vast amount of data. Therefore, real-time data streams must not overwhelm the actors involved. On the contrary, the data are to be fused to high-quality information to provide a reliable decision support. Being a challenging exploitation technology at the common interface between sensors, command & control systems, data and information fusion has a large potential for future security and ISR systems in defence and civilian applications.

Scope

Sensor Data Fusion techniques provide higher-level information by spatio-temporal data integration, the exploitation of redundant and complementary information, and the available context. Important applications exist in logistics, advanced driver assistance systems, medical care, public security, defence, aerospace, robotics, industrial production, precision agriculture, traffic monitoring, sensor positioning, and resource management.

Plenary Talk

Plenary Talk: Uwe Hanebeck

Key Aspects

- Distributed sensor fusion in complex scenarios
- Fusion of heterogeneous sensor information
- State estimation
- Exploitation of non-sensor context knowledge
- Artificial Intelligence
- Autonomous systems
- Risk analysis
- Sensor and resources management

Participants

The symposium addresses end users, software developers, research engineers, and scientists working in the area of sensor data fusion. They get insight into current research trends, innovative algorithms/system solutions, and new applications in a prospering evolving branch of applied informatics.

Fees

€ 299.-	Students
€ 399.-	ISIF or AESS Members
€ 449.-	IEEE Members
€ 499.-	Regular

- For the student registration a proof of the student status is required.
- One registration covers one paper only.

Contributions

Prospective authors are encouraged to submit high-quality full draft papers (6-8 pages, IEEE format). All submissions are subject to a peer-review process by the technical program committee. Accepted and presented papers will be submitted to IEEE for publication. At least one of the authors of each accepted contribution is expected to register for the Symposium, which will be held in Bonn, Germany, and to present the paper. Submissions can be uploaded to the CMT system at <https://cmt3.research.microsoft.com/SDF2025>. For more details contact www.fkie.fraunhofer.de/sdf2025.

Important Dates

08.08.2025	Submission of full draft papers
30.09.2025	Notification of acceptance
28.10.2025	Submission of the final version
14.11.2025	Registration closure
24.11.2025	Start of SDF Symposium
